Dovetail Games - Trains
Franchise:
Train Simulat

English

train simulator raton pass trinidad - raton route add-on

I'd really only get this route for it's stock. You can now have scenarios involving Amtrak's Superchief or ATSF on Cajon Pass or The Racetrack. However, I feel that the route is overpriced. It's 45 miles long, yet \$40. I would like it to be extended to La Junta or something. However, I feel that it's still a great content pack that comes with a route with endless possibilities.
